

Get your school's Safety Committee up and running!

The building-level safety committees are your frontline defense against unsafe conditions in your school. They provide a way to escalate safety issues to the principal directly.

Join current Safety Committee members and CTU staff to discuss how to effectively use these school-level teams to address members' needs.

- Who should be on your safety committee, and how are they formed?
- What is the process for taking an issue to the safety committee?
- What is the process for escalating a safety issue that the principal can't or won't address to the district-level safety committee?

These questions and more will be addressed during these virtual training sessions.

UPCOMING SESSIONS

Thursday, September 2, 5-6pm

Wednesday, September 8, 5-6pm

Register now for any of the above training sessions by going to www.ctulocal1.org/training.
